1. BASIS OF PRESENTATION

The unaudited financial statements have been prepared by the Company in accordance with accounting principles generally accepted in the United States of America for interim financial information, as well as the instructions to Form 10-Q. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of the Company's management, all adjustments (consisting of only normal recurring accruals) considered necessary for a fair presentation of the interim financial statements have been included. Operating results for the nine month period ended April 30, 2015 are not necessarily indicative of the results that may be expected for the full fiscal year ending July 31, 2015.

For further information refer to the financial statements and footnotes thereto in the Company's Annual Report on Form 10-K for the year ended July 31, 2014.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Company has adopted Accounting Standards Update No. 2014-10, *Development Stage Entities (Topic 915): Elimination of Certain Financial Reporting Requirements, Including an Amendment to Variable Interest Entities Guidance in Topic 810, Consolidation* , which removes all incremental financial reporting requirements from GAAP for development stage entities, including removal of Inception to Date reporting on the face of the interim and annual financial statements of the Company.

<u>Reclassifications</u>
Certain reclassifications have been made to conform to prior periods' presentation to the current presentation. These reclassifications have no effect on the results of operations or stockholders' deficit.

<u>Cash and Cash Equivalents</u>
The Company considers all highly liquid investments with maturities of three months or less to be cash equivalents. The Company's bank accounts are deposited in insured institutions. The funds are insured up to $250,000. At times, the Company's bank deposits may exceed the insured amount. Management believes it has little risk related to the excess deposits.

<u>Fair Value and Financial Instruments</u>
On April 30, 2015 and 2014, the Company's financial instruments consisted principally of cash and cash equivalents, which do not require recurring re-measurement at fair value.

<u>Mining Properties and Claims</u>
The Company capitalizes costs for acquiring mineral properties and expenses costs to maintain mineral rights and leases as incurred. Should a property reach the production stage, these capitalized costs would be amortized using the units-of-production method on the basis of periodic estimates of ore reserves. Mineral properties are periodically assessed for impairment of value, and any subsequent losses are charged to operations at the time of impairment. If a property is abandoned or sold, its capitalized costs are charged to operations.

<u>Net Loss per Share</u>
Basic earnings per share ("EPS") is computed as net loss available to common shareholders after dividends to preferred shareholders, divided by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur from common shares issuable through stock options, warrants, and other convertible debt and securities. There are no such common stock equivalents outstanding as of April 30, 2015 and 2014. In years in which a loss is incurred the effect of potential issuance of shares under options, warrants and convertible debt would be anti-dilutive and therefore basic and diluted loss per share are the same.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Use of Estimates
The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Recent Accounting Pronouncements
No recent accounting standards or interpretations issued or recently adopted are expected to have a material impact on the Company's financial position, operations or cash flows.

3. GOING CONCERN

The accompanying financial statements have been prepared under the assumption that the Company will continue as a going concern. The Company has incurred losses since its inception and does not have sufficient cash to fund normal operations and meet debt obligations for the next 12 months without deferring payment on certain current liabilities and/or raising additional funds.

The Company currently has no historical recurring source of revenue and its ability to continue as a going concern is dependent on the Company's ability to raise capital to fund its future exploration and working capital requirements or its ability to profitably execute its business plan. The Company's plans for the long-term continuation as a going concern include the profitable exploitation of its mining properties and financing the Company's future operations through sales of its common stock and/or debt. Additionally, the current capital markets and general economic conditions in the United States are significant obstacles to raising the required funds. These factors raise substantial doubt about the Company's ability to continue as a going concern.

The financial statements do not include any adjustments that might be necessary should the Company be unable to continue as a going concern. If the going concern basis were not appropriate for these financial statements, adjustments would be necessary in the carrying value of assets and liabilities, the reported expenses and the balance sheet classifications used.

On September 23, 2014, the Company executed a 25:1 reverse split of its issued and outstanding Common Shares. ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Forward-Looking Statements

Certain statements, other than purely historical information, including estimates, projections, statements relating to our business plans, objectives, and expected operating results, and the assumptions upon which those statements are based, are "forward-looking statements". These forward-looking statements generally are identified by the words "believes," "project," "expects," "anticipates," "estimates," "intends," "strategy," "plan," "may," "will," "would," "will be," "will continue," "will likely result," and similar expressions. Forward-looking statements are based on current expectations and assumptions that are subject to risks and uncertainties which may cause actual results to differ materially from the forward-looking statements. Our ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse effect on our operations and future prospects on a consolidated basis include, but are not limited to: changes in economic conditions, legislative/regulatory changes, availability of capital, interest rates, competition, and generally accepted accounting principles. These risks and uncertainties should also be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements.

Company Overview and Plan of Operations

Walker Lane Exploration, Inc. (the Company, 'we', 'us' or similar) was incorporated in the State of Nevada on March 2, 2007. On September 23, 2014, the Company changed its name to Walker Lane Exploration and continues to trade on the Financial Industry Regulatory Authority's ("FINRA") OTC market in the United States. The Company's ticker symbol changed from GSPN to WKLN. There was no change in control as a result of this name change. The Company is engaged in the principal business activity of acquiring and exploring mineral properties.

We currently control three exploration properties:

Pyramid:
On July 31, 2014, the Company acquired the mineral rights to seven 20-acre lode claims in Washoe County, NV owned by SJE Mining LLC, a company controlled by Steve Jones, an officer and director and Eric Stevenson, an officer of the Company. The purchase price was satisfied with Common Shares valued at the seller's carrying cost of the mineral rights. All rights and obligations of the seller were transferred to the Company concurrent with the purchase and sale of mineral rights.

The mining lease and option to purchase agreement dated July 31, 2014, included mineral rights to three additional lode claims, subject to a 1.75% net smelter royalty on a year-to-year basis from SJE Mining LLC. This lease was for an initial term of 10 years and included royalty payments at the inception and at each anniversary of the agreement. On January 31, 2015, SJE Mining LLC and Steve Jones transferred the ownership of these three claims to the Company by quit claim for $10 consideration, plus registration fees.

West Trinity:
On July 31, 2014, the Company acquired the mineral rights to twenty-three 20-acre lode claims in Churchill County, NV owned by SJE Mining LLC, a company owned by Steve Jones, an officer and director and Eric Stevenson an officer of the Company. The purchase price was satisfied with Common Shares valued at the seller's carrying cost of the mineral rights. All rights and obligations of the seller were transferred to the Company concurrent with the purchase and sale of mineral rights.

The mining lease and option to purchase agreement dated July 31, 2014, included mineral rights to one additional lode claim, subject to a 1.75% net smelter royalty on a year-to-year basis from SJE Mining LLC. This lease was for an initial term of 10 years and included royalty payments at the inception and at each anniversary of the agreement. On January 31, 2015, SJE Mining LLC and Steve Jones transferred the ownership of these three claims to the Company by quit claim for $10 consideration, plus registration fees.

The Pyramid and West Trinity claims purchased at July 31, 2014, were valued at the carrying cost of the seller by issuing Common shares, including the assumption of $150,000 of the seller's debt. The West Trinity and Pyramid properties have been pledged as collateral for $150,000 of the Company's debt, the due date of which was extended from May 1, 2015 to July 31, 2015. Unless we secure sufficient financing, it is unlikely that we will be able to satisfy this obligation in which case we could forfeit all rights to the property.

Paradise Peak:
On September 3, 2014, the Company located 9 claims in the Paradise Peak Mining District, Nye County, Nevada on BLM-controlled land. On October, 25, 2014, the Company located an additional 4 claims in this district. Total cost for the 9 claims was $2,250.

The Company controls 43 claims in total as of April 30, 2015 totaling 860 acres subject to annual claims fees of $155.50 per 20-acre claim for BLM and $10.50 per 20-acre claim in county fees.

Exploration Plans for Fiscal 2015

We will require a significant capital infusion in fiscal 2015, to commence any exploration activities. Prior to commencing the following program, we would need to secure $700,000 in financing at terms acceptable to us. As of the date of this report, we have no commitment for financing.

Upon successful completion of a financing sufficient for an exploration program, we expect to spend substantial amounts in connection with exploration of our mining properties. We anticipate that our expenses for our initial preparatory phase of exploration will total approximately $202,170, exclusive of any salary payable to our officers or directors.

During the initial preparatory phase of exploration, we plan to map and geochemically sample the Pyramid, West Trinity, and Paradise Properties. This work will require at least two weeks of field activities on each property. Additionally, we anticipate staking claims, mapping and sampling at least one additional property in the Walker Lane Region, which will require approximately one month's work. The cost for the surface sampling, mapping, and claim staking is projected to be approximately $17,450.

In the future, we anticipate a phased exploration plan. Phase I drilling would be conducted on the Pyramid, West Trinity, Paradise, and one as yet undetermined property, contingent upon positive results of the prerequisite surface sampling. Costs of a Phase I drilling program of approximately 6,000 feet of reverse circulation drilling, the associated assaying of drill samples, and drill permitting is expected to be approximately $173,600.

Results of Operations for the three and nine month periods ended April 30, 2015 and April 30, 2014

We earned no revenues during the fiscal nine month period ended April 30, 2015. We do not anticipate generating any revenues until such time as we determine that there are proven reserves or resources on the mineral claims. Identifying proven reserves or resources will require a significant capital infusion to conduct mapping, samplings and drilling on these properties. Drilling and testing will require significant capital expenditures. We have no commitment for additional funding. If we secure the required funding, there can be no assurance that we will identify proven reserves. Further, even if we generate revenues, there can be no assurance that the revenues will be sufficient to meet our operating expenses.

During the three month period ended April 30, 2015, our operating expenses increased to $173,265 compared with $4,177 for the three month period ending April 30, 2014. The increase was a result of expenses related to the increased business activities subsequent to the acquisition of exploration properties at July 31, 2014. Director fees increased to $6,000 as a result of accruing directors fees liability, while no such accrual occurred in the three months ended April 30, 2014. Management fees increased to $143,500 for compensation accrued for services by members of management. No such management expenses occurred in the period ended April 30, 2014. Professional fees increased to $16,593 from $3,696 and General and administrative expenses increased to $7,172 from $481 for the three month periods ended April 30, 2015 and 2014, respectively. Additionally, interest expenses increased to $56,226 from $2,750 as a result of increased borrowing for the comparable April 30 three month periods.

We incurred a net loss of $229,491, or a loss of $0.02 per share, as compared to a net loss of $6,927, or $nil per share, for the three month periods ended April 30, 2015 and 2014, respectively.

During the nine month period ended April 30, 2015, our operating expenses increased to $620,000 compared with $24,592 for the nine month period ending April 30, 2014. The increase was a result of expenses related to the increased business activities subsequent to the acquisition of exploration properties at July 31, 2014. Director fees increased to $88,500 as a result of accruing directors fees liability and issuing 50,000 shares of common stock to members of our board of directors, while no such accrual or issuance occurred in the nine months ended April 30, 2014. Management fees increased to $317,400 for compensation accrued for services by members of management. No such management expenses occurred in the period ended April 30, 2014. Professional fees increased to $181,018 from $23,971 and General and administrative expenses increased to $33,082 from $621 for the nine month periods ended April 30, 2015 and 2014, respectively. Additionally, interest expenses increased to $142,429 from $8,250 as a result of increased borrowing for the comparable April 30 nine month periods.

We incurred a net loss of $762,429, or a loss of $0.07 per share, as compared to a net loss of $32,842, or $nil per share, for the nine month periods ended April 30, 2015 and 2014, respectively.

Liquidity and Capital Resources:

At April 30, 2015, we had cash of $181 as compared to $44 at July 31, 2014. Prepaid expenses at April 30, 2015 totaled $5,875. Current assets were $6,056 at April 30, 2015 as compared to $73,841 at April 30, 2014.

Current liabilities totaled $722,367 and $238,561 at April 30, 2015 and July 31, 2014, respectively. At April 30, 2015, our current liabilities consist of $68,219 in accounts payable, $24,226 in accrued expenses, $353,820 in accrued expenses to related parties, $40,467 in shareholder loans, $147,430 in notes payable to related parties, net of discounts plus an additional $88,205 in notes payable, net of discounts. At July 31, 2014, our current liabilities consisted of $48,402 in accounts payable, $4,767 in accrued expenses, $8,529 in accrued expenses to related parties, $39,988 in shareholder loans, $91,250 in notes payable to related parties, net of discounts, and $45,625 in notes payable, net of discounts.

We have a working capital deficit of $716,311 and $164,720 as of April 30, 2015 and July 31, 2014, respectively. We had a Shareholders' deficit of $683,943 at April 30, 2015, as compared to $157,739 at April 30, 2014. We have an accumulated deficit at April 30, 2015 of $2,643,295.

During the April 30, 2015 nine month period, we had cash used by operating activities of $92,518, cash used in investing activities of $2,324, and cash provided by financing activities of $94,979, compared to cash used of $20,060 in operating activities and cash provided of $19,925 by financing activities in the April 30, 2014 nine month period.

We will continue to monitor our expenses and take actions as may be required to manage our cash outflow from operations. We will not be able to fully establish our business if we do not have adequate working capital so we will need to raise additional funds, whether through a stock offering, long term debt or otherwise.

Going Concern

The accompanying financial statements have been prepared under the assumption that the Company will continue as a going concern. The Company has incurred losses since its inception and does not have sufficient cash to fund normal operations and meet debt obligations for the next 12 months without deferring payment on certain current liabilities and/or raising additional funds.

The Company currently has no historical recurring source of revenue and its ability to continue as a going concern is dependent on the Company's ability to raise capital to fund its future exploration and working capital requirements or its ability to profitably execute its business plan. The Company's plans for the long-term continuation as a going concern include the profitable exploitation of its mining properties and financing the Company's future operations through sales of its common stock and/or debt. Additionally, the current capital markets and general economic conditions in the United States are significant obstacles to raising the required funds. These factors raise substantial doubt about the Company's ability to continue as a going concern.

The financial statements do not include any adjustments that might be necessary should the Company be unable to continue as a going concern. If the going concern basis were not appropriate for these financial statements, adjustments would be necessary in the carrying value of assets and liabilities, the reported expenses and the balance sheet classifications used.

Off Balance Sheet Arrangements

As of April 30, 2015, there were no off balance sheet arrangements.

Critical Accounting Policies

In December 2001, the SEC requested that all registrants list their most "critical accounting polices" in the Management Discussion and Analysis. The SEC indicated that a "critical accounting policy" is one which is both important to the portrayal of a company's financial condition and results, and requires management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. We do not believe that any accounting policies fit this definition for our company.

Recently Issued Accounting Pronouncements

No recent accounting standards or interpretations issued or recently adopted are expected to have a material impact on the Company's financial position, operations or cash flows.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Not Applicable.

ITEM 4. CONTROLS AND PROCEDURES.

At the end of the period covered by this Quarterly Report on Form 10-Q, an evaluation was carried out under the supervision of, and with the participation of, our management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a – 15c and Rule 15d – 15(e) of the Securities and Exchange Act of 1934, as amended (the "Exchange Act"). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that as of the end of the period covered by this Quarterly Report on Form 10-Q, our disclosure controls and procedures were effective, and that information required to be disclosed by the Company in its reports that it files or submits to the SEC under the Exchange Act, is recorded, processed, summarized and reported within the time period specified in applicable rules and forms.

Our Chief Executive Officer and Chief Financial Officer have also determined that the disclosure controls and procedures are effective, and that material information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow for accurate required disclosure to be made on a timely basis.

Changes in internal controls over financial reporting

During the period covered by this Quarterly Report on Form 10-Q, we have made no changes in our internal controls over financial reporting during the three month period ended April 30, 2015.

Limitations on the Effectiveness of Internal Controls

Our management does not expect that our disclosure controls and procedures or our internal control over financial reporting will necessarily prevent all fraud and material error. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the internal control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate.
